Out of the Past

January 9, 1897

A survey has been completed which discusses the possibility of an electrical power plant being constructed at Horse Race Rapids on the Paint River southeast of Crystal Falls. The Menominee River system is the best water power source in Michigan and Wisconsin. The power generated would be used to run the mines around the Iron Mountain area. The study made no mention of the location of a power source at the Paint River Falls within the City limits of Crystal Falls.

Crystal Falls will have another saloon. A Finlander whose name we can't spell and which you probably couldn't pronounce if you saw it in print is said to be preparing to deal out the fiery liquid to the thirsty public.
